Nu-Look

CONSERVATORY ROOF SOLUTIONS LTD

Nu-Look Conservatory Roof Solutions

Is your conservatory too hot in the Summer
and too cold in the Winter?

Nu-Look are specialists in low cost, energy efficient
conservatory roof replacement, giving you back your
perfect living space, regardless of the weather.

Solid Roofs

At Nu-Look, our specialty is the complete re-design and replacement of your existing conservatory roof with one of our low cost and energy efficient solutions of tile or slate. We will build conservatory roof replacements that will not only solve heating or cooling issues, but add real value to your property. Our time-served staff will design, manufacture and fit your new conservatory roof, giving you the highest quality of workmanship, professionalism and customer satisfaction.

The Nu-Look system has substantial heat retention and reflection benefits over other conservatory roof products (almost five times better than a standard glass roof), which will not only transform the comfort of your conservatory, but will also save you money on your energy bills. Incredibly, we achieve U-values of 0.18 which is the Building Regulations requirement for an extension.

We provide a full 10 year insurance-backed guarantee on all installations.

Giving you the highest quality of workmanship, professionalism and customer satisfaction.

We fit your new roof perfectly to your conservatory guaranteeing quality craftsmanship warmth and beauty.

"Just to say we are very pleased with the Conservatory Roof, excellent job and workmanship. It has made such a difference already, we can now use the room all year round."

Barry & Leslie Mardle
Rushden, Northants

Our Process

We build from scratch a solid conservatory roof as no two conservatories are exactly the same. This then allows us to fit your new roof perfectly to your conservatory guaranteeing quality craftsmanship warmth and beauty.

We will remove your old conservatory roof, and our specialists in joinery will build your timber roof structure, a membrane is fitted above the timber frames before we install batons to which we affix the slate or tiles, this is the standard installation method for traditional roofs and allows the roof to breathe.

Our Showroom

Our brand new showroom showcases the very best of our solid conservatory roofs. You can find us at:

**Arthur Street,
Kingsthorpe Hollow,
Northampton,
NN2 6EG**

Opening Times

Monday to Friday: 9am - 5pm

Saturday: 10am - 4pm

Sunday: 11am - 3pm

Insulation

We install 3 layers of insulation, Alumaflex multifoil insulation is installed between the membrane and the timber rafters, we then fit 40mm insulation boards between the rafters, this is then covered with 27mm insulated plasterboard, which is then skimmed to provide a smooth perfect finish.

Benefits of Alumaflex Insulation

- The only UK BBA Approved Fourteen Layer Multifoil Insulation
- Thin and highly efficient
- Ideal for roofs with timber frame construction
- Effective in both Summer and Winter
- Alumaflex Insulation retains heat during winter and reflects heat in summer preventing over-heating warm spaces

"All of your team were excellent, everything went smoothly, we can't thank you enough. "

Jayne & Graham,
Kettering, Northants

Insulation Boards

The insulation boards are 40mm thick comprising of a polyisocyanurate rigid foam insulation core with a thermal conductivity of 0.023 W/mK with low emissivity aluminium foil facings on both sides.

- The insulation boards are CFC/HCFC free
- Zero ODP and low GWP
- Manufactured to EN ISO 13165 under Quality Systems approved to EN ISO 9001 quality management, EN ISO 14001 environmental management.
- Achieves an 'A+' rating when compared to the BRE Green Guide
- Is suitable for a range of applications including pitched roofs, walls and floors

"Our new roof has now made our conservatory into a room which we hope to use all year round where we will be able to enjoy looking at our garden and relaxing."

Jeannette & Len,
Brinklow, Warwicks.

Tapco Slate

The TapcoSlate highlights the handsome character of slate, at the same time enhancing roof performance through innovative design, the slates are created with mould cases from real slate to capture genuine peaks, plateau and curves. The colour through design and UV stabilisation ensures "stay-true" richness of colour. Our most popular colours are Chestnut Brown, Brick Red, Stone Black, Plum, Red Rock and Pewter Grey, but alternative slate colours are available.

Enhancing roof performance through innovative design, the slates are created with mould cases from real slate

- Lightweight – as low as 12kg per sq metre.
- Authentic slate appearance – combines the beauty of slate with modern technology.
- Random edges and patterns with constant colour throughout.
- BBA approved on roof pitches of 14.5° and upwards on both felt & batten and fully boarded applications.
- Random edges and patterns with constant colour throughout.
- Fully tested to BBA Standards, including fire rating, wind, driven snow & rain and water absorption.
- 40-year warranty

- **Freeze-Thaw Cycle:** No signs of damage or cracking after 300 cycles
- **Water Absorption:** No appreciable weight gain
- **Temperature Cycling:** No signs of cracking, curling, deformation, or visible expansion.

By replacing your conservatory roof with a new light weight solid roof, it will transform the outside of your conservatory, but we will also transform the inside, our highly skilled plasterers will finish the inside to a high standard, we can also install stunning energy saving lighting or a lighting pelmet which will make a wonderful focal point to your new room.

If you have concerns about there being less light in your conservatory after the new solid roof has been installed we can install Velux Windows allowing more light in.

VELUX®

Building Regulations

On the whole, conservatories are exempt from building regulations as long as it is :

- Less than 30 square metres.
- At ground level.
- At least 50% of new walls are of a transparent or translucent material.
- At least 75% of the roof is of a transparent or translucent material.
- It must be separated from the habitable parts of the dwelling by external quality windows / doors.
- Any glazing below 1500mm in height in doors or within 300mm of a door must be toughened / laminated glass or polycarbonate.
- Any glazing below 800mm in height must be toughened / laminated glass or polycarbonate.
- Any heating or cooling systems must have independent controls / thermostat.

As a replacement solid slate or tiled roof means that 75% of the roof no longer has transparent or translucent material, then you do require a Final Certificate under building regulations.

So, if you are being advised by a company that you do not need a Final Certificate from an Approved Building Inspector when a polycarbonate or glass roof is replaced with a solid roof then beware as the likelihood is that you will not be able to sell your home.

Due to the process of installation that we follow it allows us to provide Final Certificates on all of the conservatories where we replace the original polycarbonate or glass roof.

We work in partnership with jhai Limited giving you complete confidence in our work.

We work in partnership with jhai Limited who are Approved Building Inspectors. Each installation will be checked by jhai limited for structural and thermal compliance during and after installation and their surveyors will visit to ensure the work is installed properly and in compliance with Building Regulations giving you complete confidence in our work.

Testimonials

At Nu-Look we have over 40 years combined experience in the conservatory and roofing business. Customer satisfaction is at the heart of everything we do and we pride ourselves on the quality of workmanship and service that we provide.

"Our replacement roof has finally said goodbye to temperatures in summer resembling the Sahara and in Winter more in line with the Arctic. At last we have now another room we can enjoy all year round. I have no hesitation recommending you to any prospective customer. The workmanship is second to none. The team that came to install the roof, the electrician and the plasterers and painter were fantastic. A very rare commodity these days. Thank-you"

"The fact that you have now provided our home with a room that can be used 365 (and a quarter) days of the year, I can't thank you and your team enough. It also meant that my 40-year-old stereo that was banished to the loft for being 'to big' now has a more sociable home and is part of the family again. (Oh yeah and it provided a great the use as a great dining room for 10 people at Xmas). I would have absolutely no problem in recommending you and your company to anyone."

"We are delighted with the final result as it has become immediately beneficial to us, increasing the level of heat in winter and reducing noise levels, as we are very close to an Airport. It has definitely added an extra room to the property as it now feels more like an extension. The team were very courteous, professional and tidy and worked incredibly hard. Their workmanship was excellent and it was a pleasure to have them on site. Thank you for an outstanding job and keeping to everything you promised. We would highly recommend this Company to anyone."

"The workmanship is second to none. The team that came to install the roof, the electrician and the plasterers and painter were fantastic."
